

MBE Certified **Union Contractor**

About Us

We are a Minority-Owned, Carpentry & Drywall Sub-Contractor, Certified with various City & State agencies. CDI is a family-owned business that was formed in 2017. We are a self-performing union contractor with experienced employees, totaling over 35 years in the NYC construction industry. We are a full-service firm providing everything from a full Carpentry & Drywall Scope, to just Taping & Black Iron services. We have recently added Labor Management Services into our offerings, as we encountered many clients who needed only temporary licensed and insured labor. We are proud of the relationships we have fostered with our partners and clients and look to continuously and aggressively grow while maintaining a customer and lean driven operation.

MBE Certified

100% Self Performing Union Contractor

Custom Design Innovations (CDI) is based in New York City and we are MBE-certified by New York State, New York City, New Jersey, and in Philadelphia. Because diversity and inclusion is important to us, we ensure that we employ a variety of skilled laborers in whatever projects we take on. Not only are we helping to build buildings, but we are helping to build the communities that surround them. Be part of that movement by hiring CDI for your construction needs.

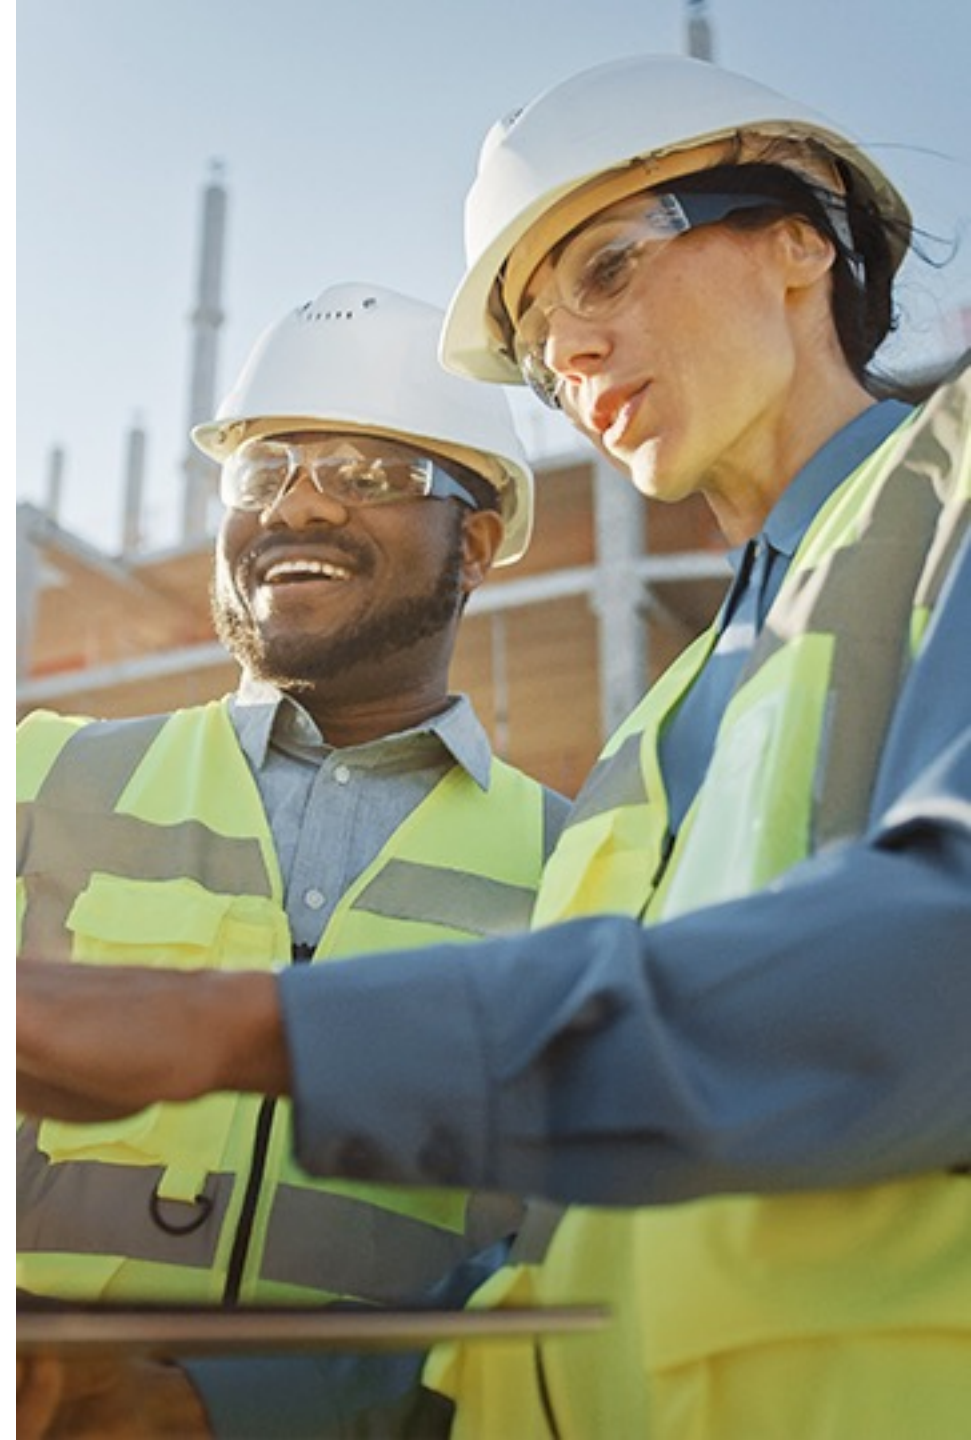

Meet your MBE goals for your contract by using CDI's Labor Management Services. Because we are a Certified Minority Business Enterprise (MBE), we can provide the labor for any project within our scope of services. Government contracts can require a minimum quota of participation by minority-owned businesses, and we can help you meet this quota. We can even work with you on the bidding process.

Labor Management **Services**

CDI can help staff your job sites at a variety of locations, such as schools, commercial buildings, retail outlets, and more. We pair our skilled workers with you to support you with your new construction, demolition, or remodeling projects, based on your unique needs, timeline and budget.

Our approach involves more than just scheduling labor. We assist you with forecasting your labor needs so that you can ramp it up when you need to, or downgrade when needed. We ensure our skilled workers are motivated and prepared for the task at hand by supporting them in developing new skills and staying up to date on their certifications. We value clear, honest and efficient communication to make sure everyone has the information they need to complete the job successfully. And we keep thorough, detailed, and secure project records; saving you even more time to do what you need to do.

Most importantly, we help you get the job done safely. Whether you need skilled workers to complete the entire job, or just step in when staff is running a little short, we've got you covered. Avoid your own staff from becoming overworked by letting us fill in the gaps to ensure your project runs smoothly and efficiently.
